

Toyota 12v Battery Recycling Kit: Label Pack

Contents List

Outer Box
Regulations Label (teal) x2

Return
Shipping Label x1

Tape Strip x1

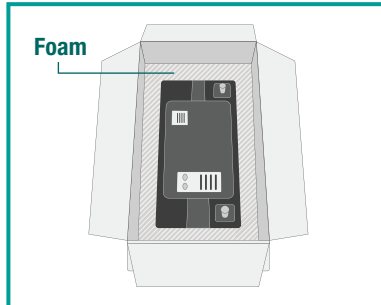

Instructions x1

BEFORE BEGINNING: Write the date the battery was removed from the vehicle in the Accumulation Start Date location on the outer shipping label.

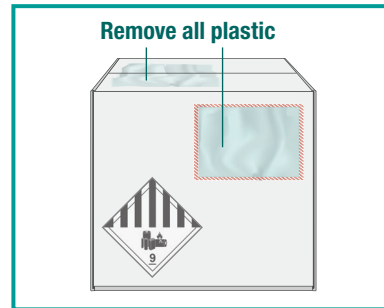

UNPACK & PREPARE

Step 1: Insert used battery

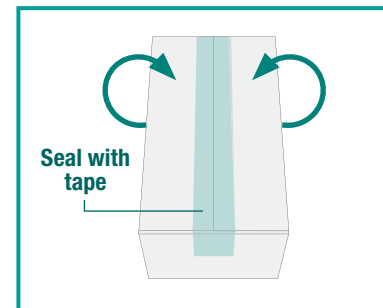

Place used battery into the box that the new battery was shipped in. Reinsert all (top, bottom & side) foam pieces to completely surround the used battery.

Step 2: Prepare outside

Remove any plastic document pouches from the box surface. Stickers, marks & labels may remain and will be covered in step 4.

Step 3: Close & seal box

Fold the box flaps closed. Apply the provided strip of tape lengthwise along where the flaps meet to create a seal.

IMPORTANT

- ! Be sure to remove ALL plastic document pouches before applying the Regulations Label (teal) to BOTH sides of the outer box.
- ! Make sure the Regulations Label (teal) are centered on each side panel and do not wrap around to another panel.
- ! Do not use box if ripped, torn, or structurally compromised. Stop and order a new box at call2recycle.org/toyota12v

SEAL & SHIP

Step 4: Place teal labels

Place one outer box label on each side of the box **COMPLETELY COVERING** the Class 9 Battery & FedEx Hazardous Materials labels.

Step 5: Place shipping label

Place the return shipping label on the top (taped side) of the box so that it completely covers the original shipping label.

Step 6: Ship box

Give your package to your UPS[®] driver.
